Access Solutions

TIS CONTROL EVERYTHING

Introduction

Upgrade your hotel's security and guest experience with TIS Smart Hotel Access Solutions.Designed specifically for the hospitality industry,this comprehensive system includes advanced smart locks, a card encoder, access-control panels, and app-based access features-all working together to provide secure, efficient, and seamless entry for both guests and staff.

TIS Hotel Access Solutions support two access methods, including RFID cards and passcodes. In addition, they are integrated with Opera PMS, ensuring centralized, real-time management of guest access and room assignments. From check-in to check-out, TIS simplifies operations, reduces manual tasks, and enhances the overall guest journey.

Complete Access Control Suite

Manage room access with smart locks, card encoders, and app-based control—all integrated into one flexible system.

Everywhere

user-friendly

TIS CONTROL EVERYTHING

Opera PMS Integration

Automatically syncs guest profiles and room access with Opera PMS for a seamless, real-time experience.

Passcode & RFID-Based Access

Guests can use either a passcode or an RFID card to unlock their rooms—conveniently and without a physical key.

• Flexible Management Tools

Staff can issue, reprogram, or deactivate access credentials instantly through the TIS system.

Battery-Operated Reliability

Smart locks offer long battery life with low-battery alerts and emergency power access via external ports.

Secure & Expiring

Access rights can be customized to expire automatically, enhancing security for rooms and shared areas.

Efficient Check-In Experience

Faster room access with automated credential creation reduces front-desk traffic and improves guest satisfaction.

Sleek & Durable Design

Crafted from high-quality materials, TIS devices are built to last while complementing any interior design.

Door Lock Features A233

- RFID Card Reader
- Unlock via fingerprint
- Unlock via mechanical key
- Auto-Locking
- Battery Powered (about 10 months)
- External power port
- Internal Material: Stainless steel
- Shell Materials: Aluminum alloy, ABS, tempered glass
- Available Colors: Black, Silver/Black

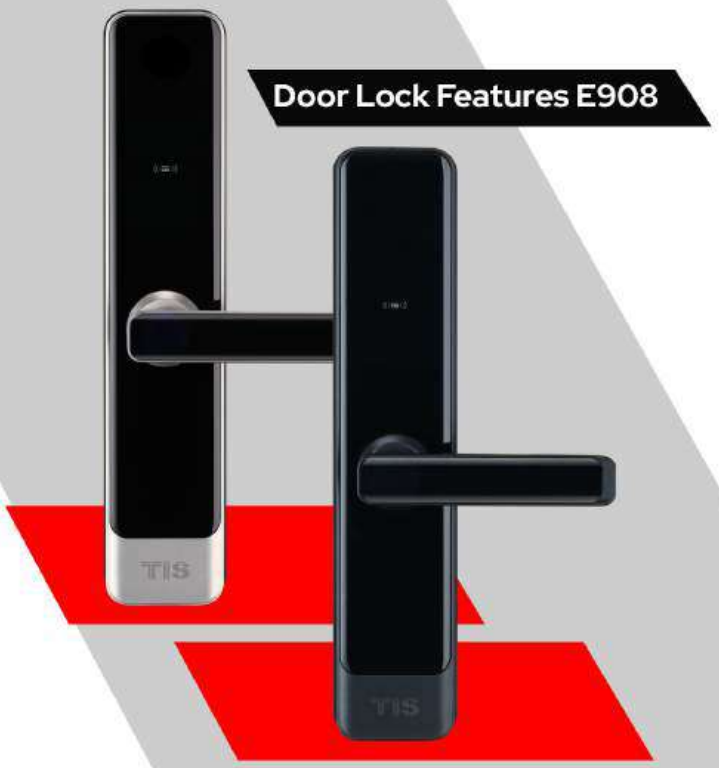

Door Lock Features A270

- RFID Card Reader
- Unlock via fingerprint
- Unlock via mechanical key
- Auto-Locking
- Battery Powered (about 10 months)
- External power port
- Internal Material: Stainless steel
- Shell Materials: Aluminum alloy, ABS, tempered glass
- Available Colors: Black, Silver/Black

Door Lock Features E908

- RFID Card Reader
- Unlock via fingerprint
- Unlock via mechanical key
- Auto-Locking
- Battery Powered (about 10 months)
- External power port
- Internal Material: Stainless steel
- Shell Materials: Aluminum alloy, tempered glass
- Available Colors: Black

Door Lock Features E200

- RFID Card Reader
- Unlock via mechanical key
- Auto-Locking
- Battery Powered (about 10 months)
- External power port
- Internal Material: Stainless steel
- Shell Materials: Aluminum alloy, tempered glass
- Available Colors: Gold

Door Lock Features E300

- RFID Card Reader
- Unlock via mechanical key
- Auto-Locking
- Battery Powered (about 10 months)
- External power port
- Internal Material: Stainless steel
- Shell Materials: Aluminum alloy, ABS
- Available Colors: Gold

Door Lock Features E901

- RFID Card Reader
- Unlock via mechanical key
- Auto-Locking
- Battery Powered (about 10 months)
- External power port
- Internal Material: Stainless steel
- Shell Materials: Aluminum alloy, tempered glass
- Available Colors: Black

Door Lock Features S181

- RFID Card Reader
- Unlock via mechanical key
- Auto-Locking
- Battery Powered (about 10 months)
- External power port
- Internal Material: Stainless steel
- Shell Materials: Aluminum alloy

Door Lock Features K710

- RFID Card Reader
- Unlock via fingerprint
- Unlock via mechanical key
- Auto-Locking
- Battery Powered (about 10 months)
- External power port
- Internal Material: Stainless steel
- Shell Materials: Aluminum alloy, tempered glass
- Available Colors: Silver/Black
